

Adhavan J.V.R

Chennai, India | +91 9941735736 | adhavanjvr@gmail.com | adjvr007@gmail.com | linkedin.com/in/adhavan-jvr | github.com/Adhavan07

PROFESSIONAL SUMMARY

DevOps-focused engineer with hands-on experience in Linux systems (Ubuntu, Fedora, Debian, RHEL), Bash scripting, and command-line automation. Skilled in building and operating CI/CD pipelines using Jenkins, GitHub Actions, Docker, Kubernetes, Terraform, and AWS/Azure cloud-native infrastructure. Open-source contributor to Kubeflow Pipelines and Netflix Metaflow with experience in issue analysis, maintainer discussions, and workflow investigation. Comfortable working with Linux services, logs, and monitoring tools, with a strong self-learning mindset focused on automation, platform engineering, MLOps, and scalable systems.

TECHNICAL SKILLS

Operating Systems & Scripting:	Linux (Ubuntu, Fedora, Debian, RHEL) – processes, permissions, systemd; Bash scripting, cron jobs, CLI automation
Cloud:	AWS (EC2, IAM, S3, CloudWatch, SNS), Azure
Containers & CI/CD:	Docker, Kubernetes, Docker Hub integration; Jenkins pipelines, GitHub Actions, Gitea
IaC & Monitoring:	Terraform, Ansible; Prometheus, Grafana, CloudWatch
Security:	IAM, Trivy, SonarQube, Secrets Management
Programming:	Python, Bash, Shell Scripting
MLOps:	FastAPI, MLflow, Scikit-learn
Tools:	Git, GitHub, Gitea, VS Code, Jira

PROFESSIONAL EXPERIENCE

- | | |
|--|---------------------|
| Xenovex Technologies Pvt. Ltd – DevOps Intern | Jun 2025 – Aug 2025 |
| <i>Linux, Jenkins, Docker, AWS, Azure, Gitea</i> | |
| <ul style="list-style-type: none">Worked on Linux-based CI/CD environments, configuring Jenkins pipelines and managing build agents.Built and maintained Jenkins CI/CD pipelines, automating build and deployment workflows using Docker and Bash scripts.Managed Docker workloads and cloud resources across AWS and Azure environments.Implemented Grafana dashboards and monitoring solutions for application observability; monitored application performance and logs using Grafana and Azure monitoring services.Troubleshoot pipeline failures, Linux issues, and networking/deployment problems using CLI tools and system logs. | |
| Mapol Business Solutions Pvt. Ltd – Application Development Trainee | Apr 2025 – May 2025 |
| <ul style="list-style-type: none">Developed REST APIs using .NET Core and MySQL; collaborated on Angular front-end applications. | |

OPEN SOURCE CONTRIBUTIONS

- Kubeflow Pipelines Contributor** – Investigated Kubernetes version support policies, CI workflows, and maintainer discussions within Kubeflow Pipelines.
- Netflix Metaflow Contributor** – Analyzed issues involving AWS Batch, Argo workflows, CLI logging behavior, and Kubernetes execution environments.

PROJECTS

- | | |
|--|---------------------|
| CI/CD DevOps Pipeline Project (Enterprise CI/CD Platform with Kubernetes) | Jan 2025 – Feb 2025 |
| <i>Linux, Bash, Terraform, Jenkins, Kubernetes, AWS</i> | |
| <ul style="list-style-type: none">Designed and implemented an end-to-end CI/CD pipeline on Linux-based infrastructure, automating pipeline stages using Bash scripts and Linux command-line tools. | |

- Provisioned CI/CD infrastructure and Kubernetes resources using Terraform (IaC); automated end-to-end deployment workflows on AWS.
- Integrated security scanning (Trivy), code quality checks (SonarQube), and artifact management (Nexus).
- Monitored Jenkins and Kubernetes clusters using Prometheus and Grafana.

Application Deployment on AWS (AWS Application Deployment)

Sep 2024 – Dec 2024

Linux, Bash, Docker, Jenkins, AWS

- Provisioned and managed Linux-based AWS EC2 instances for application hosting.
- Automated application deployment using Bash scripts and Docker containers.
- Built Jenkins CI/CD pipelines to build images, push to Docker Hub, and deploy on EC2.
- Configured CloudWatch and SNS alerts for health monitoring and downtime notifications.

MLOps Project: Diabetes Prediction Model (MLOps Prediction Service)

Aug 2025

Python, Scikit-learn, FastAPI, Docker, Kubernetes, GitHub Actions

- Built and trained a Random Forest model in Python and exposed predictions via a FastAPI service.
- Containerized the application using Docker and deployed on Kubernetes with multiple replicas.
- Automated the ML workflow from data ingestion to deployment using Git-based pipelines and GitHub Actions.

EDUCATION

Misrimal Navajee Munoth Jain Engineering College

June 2024

B.E. Computer Science Engineering – CGPA: 8.0

CERTIFICATIONS

- DevOps Certification – GUVI
- CI/CD Certification – Infosys Springboard
